Dear ,

Cross Tree Crescent and Oakley Flats Regeneration

I wanted to let you know that we will be carrying out further investigative works in the area on the Thursday 19th July.

We will be carrying out a ground investigation. The company carrying out this investigation will be using a mini rig to bore holes into the ground, these will then be refilled. They will be carrying out the work in the communal grounds of Oakley Flats, the car park behind the homes in Cross Tree Crescent and the front garden of one of the properties that Bromford owns. I would appreciate it if you could ensure that you or your children do not access any of these areas on these days.

The boreholes will only be approximately 6" in diameter, we will be installing gas and groundwater monitoring pipe in the 4 of the positions, those boreholes be finished with a plastic cover, set flush against the surrounding ground levels. The remaining boreholes will be backfilled with arisings and bentonite.

The consultants we are using from Ground Investigation and Piling limited. They will be on site for two days. Thank you in advance for your cooperation.

Yours sincerely

Claire Thomas
Regeneration Manager
